Profile

Versatile programmer, front-end and back-end. Open source enthusiast with a particular interest in automation.

Experience

Sabbatical
2011 - 2013, Taiwan

Took Mandarin classes for 18 months. Contributed to WD.js, a Webdriver client for Node.js (#1 committer). Created several tools to facilitate e2e testing using Node.js. Built a site using the Django stack and PostGIS. Experimented with various technologies including Ruby-on-Rail, Scala, NoSQL databases, Docker and SaltStack.

Programmer at CMA-CGM
2008 - 2010, Taipei, Taiwan

Development of a batch accounting application using Java and on-site support (contract).

Sabbatical
2007 - 2008

Traveled in France, Italy and Taiwan.

Lead programmer at Glu Mobile
2005 - 2007, London

Led the evolution of a mobile game provisioning platform (Java, JBoss, Spring, MySQL).

Lead programmer, co-founder at Macrospace
2001 - 2005, London

Led the development of a mobile game provisioning platform (Java, JBoss, MySQL). Also worked on several side projects including J2ME games and multi-player game servers.

Programmer at Digital Mobility
2000 - 2001, London

Development of WAP applications (Java).

Programmer at Nokia

1999 - 2000, Camberley, UK

Development of components for a WAP portal (Java).

Programmer in financial institutions

1997 - 1999, London and Paris

Development of financial applications using C++.
